

MAKE IT SAFER

for children in your care

Kids are fast, curious, and unpredictable. Whether they're in a small in-home daycare, a large child care center, or simply their own home, countless dangers can be found around every corner.

In the hopes of keeping kids safe everywhere, West Bend's loss prevention experts wish to share several resources you can use to help make it safer for the children in your care.

Safety Tips

Visit our Resource Hub at thesilverlining.com-resource-hub for a list of childcare safety articles. Select Childcare from the "Category" drop-down menu to view tips that range from allergies in children to baby gate injuries to expired certifications.

You'll also find other childcare safety resources, including a FREE guide called Childcare Dangers. This 27-page guide has information on some of the most common sources of injuries and childcare insurance claims originating in in-home daycares and childcare centers. In addition to detailed information and prevention tips, the Childcare Safety Guide includes a printable checklist parents and providers can use to make a child's environment as safe as possible.

In this free safety guide you'll learn how to prevent:

- Burns and scalds caused by bottle warming
- Injuries caused by falling bookcases and shelves
- Door-related finger injuries and amputations
- Vehicular hyperthermia deaths
- Sudden infant death syndrome (SIDS)
- Playground injuries
- Childcare Security

There's nothing more important than taking care of children. That's why West Bend is committed to helping you provide safe and nurturing environments for the children in your care. We hope you'll take advantage of these valuable free resources that can help you do just that.
